MENTAL HEALTH CARE PROFESSIONAL EPISODE (ACUTE HOME-BASED)

Change to Supporting Information: Changed Description

~~Mental Health Care Professional Episode (Acute Home-Based) is an ACTIVITY GROUP.~~A Mental Health Care Professional Episode (Acute Home-Based) is an ACTIVITY GROUP.

A PATIENT may not have concurrent Mental Health Care Professional Episodes (Acute Home-Based) or

Consultant Episodes (Hospital Provider) but can have Consultant Episodes (Hospital Provider) overlapping with a Mental Health Care Professional Episode (Acute Home-Based).

The start of a Mental Health Care Professional Episode (Acute Home-Based) will initiate a series of contacts at the PATIENT's normal place of residence to deliver care, each of which will be recorded as an Acute Home-Based Contact. Where face to face contact occurs with the allocated care coordinator, a Face To Face Contact CPA Care Coordinator will also be recorded. In circumstances of the PATIENT approaching readiness for ending the period of care or are in a period of trial withdrawal, contact may be by telephone.

The Mental Health Care Professional Episode (Acute Home-Based) will be ended when the Mental Health CARE PROFESSIONAL determines no further acute home-based care is required. When responsibility for a PATIENT transfers from one Mental Heath CARE PROFESSIONAL to another, then one Mental Health Care Professional Episode (Acute Home-Based) will be ended and another one will be started.

For each Mental Health Care Professional Episode (Acute Home-Based) the responsible Mental Health CARE PROFESSIONAL's MAIN SPECIALTY should be recorded together with the TREATMENT FUNCTION. Each episode of acute home-based care must be associated with a PATIENT's single address, and may be made up of a number of Acute Home-Based Contacts.

~~Information recorded for a Mental Health Care Professional Episode (Acute Home-Based) includes:~~

- ~~EPISODE NUMBER~~
- ~~End Date~~ ~~O~~
- ~~Start Date~~
- ~~TELEPHONE CONTACT INDICATOR~~

This usually involves the PATIENT attending an Out-Patient Clinic.

Lists can be maintained in several forms, using either computer or manual systems, including CONSULTANTS'

diaries. They may be kept by TREATMENT FUNCTION CODE or for an individual CARE PROFESSIONAL. A PATIENT can be on more than one Out-Patient Waiting List. This may be because the PATIENT needs treatment for more than one condition or because the PATIENT has been placed on the list of more than one provider for the same condition.

It is also possible for a PATIENT to be entered on an Out-Patient Waiting List more than once, either for a different condition where it will be a different referral, or for the same condition, where two or more APPOINTMENTS are required.
