

NHS Data Model and Dictionary

Type: Data Dictionary Change Notice
Reference: 1902
Version No: 1.0
Subject: Retirement of Patient Level Information Costing System (PLICS) Data Sets
Effective Date: Immediate
Reason for Change: Retirement of Data Sets
Publication Date: 10 January 2024

Background:

The Patient Level Information and Costing System Information Standards have been retired and are now classified as data collections.

This Data Set Change Notice (DDCN) retires the Patient Level Information Costing System (PLICS) Data Sets and supporting definitions from the NHS Data Model and Dictionary.

A short demonstration is available which describes "How to Read an NHS Data Model and Dictionary Change Request", in an easy to understand screen capture including a voice over and readable captions. This demonstration can be viewed at: https://datadictionary.nhs.uk/elearning/change_request/index.html.

Note: if the web page does not open, please copy the link and paste into the web browser. A guide to how to use the demonstration can be found at: [Demonstrations](#).

PATIENT LEVEL INFORMATION COSTING SYSTEM AMBULANCE DATA SET OVERVIEW (RETIRED)_renamed from PATIENT LEVEL INFORMATION COSTING SYSTEM AMBULANCE DATA SET OVERVIEW

Change to Supporting Information: Changed Name, Description, status to Retired

~~Please note that the Patient Level Information and Costing Systems standards have now been retired as Information Standards and are now classified as data collections. This item has been retired from the NHS Data Model and Dictionary.~~

~~The Patient Level Information Costing System data sets will be retired from the NHS Data Model and Dictionary. The last live version of this item is available in the November 2023 release of the NHS Data Model and Dictionary.~~

~~The NHS Data Model and Dictionary content relating to the Patient Level Information Costing System data sets has not been updated for the financial year 2021-2022 and 2022-2023. Access to this version can be obtained by emailing information.standards@nhs.net with "NHS Data Model and Dictionary - Archive Request" in the email subject line.~~

~~Please refer to the "Standards and collections" pages at: [Patient Level Information and Costing Systems](#) for the latest specifications.~~

Introduction

~~The [Patient Level Information Costing System Ambulance Data Set](#) is used to standardise the method of reporting cost information at [Ambulance Incident](#) level. All designated providers of [Ambulance Services](#) are required to submit [Patient Level Information Costing](#) data.~~

~~The [Patient Level Information Costing System Ambulance Data Set](#) is used to:~~

- ~~• inform new methods of pricing NHS [SERVICES](#)~~
- ~~• inform new approaches and other changes to the design of the currencies used to price NHS [SERVICES](#)~~
- ~~• contribute to [NHS England](#)'s strategic objective of a 'single national cost collection by 2020' to inform the relationship between provider characteristics and cost~~
- ~~• help [NHS Trusts](#) to maximise use of their resources and improve efficiencies, as required by the provider licence~~
- ~~• identify the relationship between [PATIENT](#) characteristics and cost~~
- ~~• support an approach to benchmarking for regulatory purposes.~~

Data Extract Specification

Description

[NHS England](#) have mandated all designated providers of [Ambulance Services](#) to record and report:

- [Patient Level Information Costing System Ambulance Data Set](#)
- [Patient Level Information Costing System Reconciliation Data Set](#)

Reporting is required at the end of each financial year, consistent with the methodologies and submission processes in the [Approved Costing Guidance](#). This only includes those NHS [Health Care Providers](#) noted in the [Costing Mandation Timetable](#) and does not include non NHS [Health Care Providers](#).

Time

The data is collected annually. It must be submitted in accordance with the timetable set out by [NHS England](#) in the National Cost Collection Guidance (part of the [Approved Costing Guidance](#)).

Format

The data should be submitted in an XML file, created by [NHS England's Data Validation Tool \(DVT\)](#). Information on how to access and use this tool is included in the National Cost Collection Guidance (part of the [Approved Costing Guidance](#)).

Transmission

~~Patient Level Information Costing~~ data will be submitted to [NHS England](#) using ~~Secure Electronic File Transfer (SEFT)~~. ~~Secure Electronic File Transfer (SEFT)~~ can only be accessed by registered and approved users and [NHS England](#) will invite relevant people to register for the service and provide details of the log in process.

Mandation

The Mandatory or Required (M/R) column indicates the recommendation for the inclusion of data.

- M – Mandatory: this data element is mandatory and the technical process (e.g. submission of the data set, production of output etc) cannot be completed without this data element being present
- R – Required: NHS business processes cannot be delivered without this data element.

Data Set Constraints

For guidance on the Data Set constraints, see the [PLICS Ambulance Data Set Constraints](#).

Change to Supporting Information: Changed Name, Description, status to Retired

~~Please note that the Patient Level Information and Costing Systems standards have now been retired as Information Standards and are now classified as data collections.~~ This item has been retired from the NHS Data Model and Dictionary.

~~The Patient Level Information Costing System data sets will be retired from the NHS Data Model and Dictionary. The last live version of this item is available in the November 2023 release of the NHS Data Model and Dictionary.~~

~~The NHS Data Model and Dictionary content relating to the Patient Level Information Costing System data sets has not been updated for the financial year 2021-2022 and 2022-2023. Access to this version can be obtained by emailing information.standards@nhs.net with "NHS Data Model and Dictionary - Archive Request" in the email subject line.~~

~~Please refer to the "Standards and collections" pages at: [Patient Level Information and Costing Systems for the latest specifications.](#)~~

Introduction

The [Patient Level Information Costing System Integrated Data Set](#) is used to standardise the method of reporting cost information at [PATIENT](#) level. All designated NHS [Health Care Providers](#) are required to submit [Patient Level Information Costing](#) data.

The [Patient Level Information Costing System Integrated Data Set](#) is used to:

- inform new methods of pricing NHS [SERVICES](#)
- inform new approaches and other changes to the design of the currencies used to price NHS [SERVICES](#)
- contribute to [NHS England](#)'s strategic objective of a 'single national cost collection'
- inform the relationship between provider characteristics and cost
- help [NHS Trusts](#) to maximise use of their resources and improve efficiencies, as required by the provider licence
- identify the relationship between [PATIENT](#) characteristics and cost
- support an approach to benchmarking for regulatory purposes.

Data Extract Specification

Description

[NHS England](#) has mandated designated [NHS Trusts](#) and [NHS Foundation Trusts](#) to record and report:

- [Patient Level Information Costing System Reconciliation Data Set](#)
- [Patient Level Information Costing System Integrated Data Set – Admitted Patient Care \(Acute\)](#)
- [Patient Level Information Costing System Integrated Data Set – Emergency Care \(Acute\)](#)
- [Patient Level Information Costing System Integrated Data Set – Out Patient Care \(Acute\)](#)
- [Patient Level Information Costing System Integrated Data Set – Specialist Ward Care \(Acute\)](#)
- [Patient Level Information Costing System Integrated Data Set – Supplementary Information](#)
- [Patient Level Information Costing System Integrated Data Set – Admitted Patient Care \(Mental Health\)](#)
- [Patient Level Information Costing System Integrated Data Set – Care Contacts \(Mental Health\)](#)
- [Patient Level Information Costing System Integrated Data Set – Improving Access to Psychological Therapies](#)

Reporting is required at the end of each financial year, consistent with the methodologies and submission processes in the [Approved Costing Guidance](#). This only includes those NHS [Health Care Providers](#) noted in the [Costing Mandation Timetable](#) and does not include non-NHS [Health Care Providers](#).

Time

The data is collected annually. It must be submitted in accordance with the timetable set out by [NHS England](#) in the National Cost Collection Guidance (part of the [Approved Costing Guidance](#)).

Format

The data should be submitted in an XML file, created by [NHS England](#)'s Data Validation Tool (DVT). Information on how to access and use this tool is included in the National Cost Collection Guidance (part of the [Approved Costing Guidance](#)).

Transmission

~~[Patient Level Information Costing](#) data will be submitted to [NHS England](#) using [Secure Electronic File Transfer \(SEFT\)](#). [Secure Electronic File Transfer \(SEFT\)](#) can only be accessed by registered and approved users and [NHS England](#) will invite relevant people to register for the service and provide details of the log in process.~~

Mandation

The Mandation column indicates the recommendation for the inclusion of data.

- M – Mandatory: this data element is mandatory and the technical process (e.g. submission of the data set, production of output etc) cannot be completed without this data element being present
- R – Required: NHS business processes cannot be delivered without this data element.
