

## Change Request

### NHS Connecting for Health

#### NHS Data Model and Dictionary Service

**Reference:** Change Request 1242  
**Version No:** 1.0  
**Subject:** Retirement of Mental Health Minimum Data Set Version 3  
**Effective Date:** Immediate  
**Reason for Change:** Change to Data Standards  
**Publication Date:** 8 March 2012

#### Background:

The Mental Health Minimum Data Set v4.0 was introduced in April 2011 to support the recommendations of the Mental Health Informatics Review. This resulted in the retirement of the previous version of the data set and its supporting XML Message Schema.

This Data Dictionary Change Notice introduces the following changes to the NHS Data Model and Dictionary.

- retirement of the Mental Health Minimum Data Set Version 3 with associated data definitions, attributes, data elements and XML message schema
- amendment to NHS Business Definition Care Programme Approach Episode to reflect the change in definition of Care Programme Approach Level - see Department of Health 'Refocusing the Care Programme Approach' - March 2008 ([http://www.dh.gov.uk/en/Publicationsandstatistics/Publications/PublicationsPolicyAndGuidance/DH\\_083647](http://www.dh.gov.uk/en/Publicationsandstatistics/Publications/PublicationsPolicyAndGuidance/DH_083647))

The amendment to the NHS Business Definition of Care Programme Approach Episode has been approved by The NHS Information Centre for health and social care.

Change to Data Set: Changed status to Retired, Description, Name

The [Mental Health Minimum Data Set](#) concerns adult [PATIENTS](#) (including elderly) who receive care in NHS specialist mental health services. This care is delivered within a [Adult Mental Health Care Spell](#). For some [PATIENTS](#), care will comprise a small number of [Out-Patient Appointments](#) over a few weeks. For others, it may extend over many years and include hospital, community, out-patient and day care attendances which may commonly overlap. [See the Clinical Data Sets Menu for a link to the latest version of the data set.](#)

The Mental Health Minimum Data Set is assembled and produced for a defined period of time known as the REPORTING PERIOD (which may be monthly, quarterly or annually) and comprises a data set record for each Adult Mental Health Care Spell which occurs wholly or partially within the REPORTING PERIOD. The last live version of the Mental Health Minimum Data Set (Version 3) is available in the January 2012 release of the NHS Data Model and Dictionary.

## CARE PROGRAMME APPROACH EPISODE

---

Change to Supporting Information: Changed Description

[Care Programme Approach Episode](#) is an [ACTIVITY GROUP](#).

A period of care provided as part of the care programme approach for an adult (including elderly) [PATIENT](#). The [Care Programme Approach Episode](#) forms part of a [Adult Mental Health Care Spell](#).

The first [Care Programme Approach Episode](#) starts when the [Adult Mental Health Care Spell](#) initial assessment of the [PATIENT](#) determines that a plan of care or treatment is required which will be delivered under the care programme approach.

The [Care Programme Approach Episode](#) ends when one of the following occurs:

- a review determines that no further care need be provided
- a different level of care programme approach is required
- a [PATIENT](#) transfers to another [Health Care Provider](#) with main responsibility for provision of mental health care also being transferred
- death of the [PATIENT](#)

A [Care Programme Approach Episode](#) must involve all of the following key elements:

- a. An assessment of the [PATIENT](#)'s health and social care needs
- b. A written care plan to meet the assessed needs, the [PATIENT](#) being involved in drawing up the care plan
- c. Regular reviews of the [PATIENT](#)'s care plan
- d. A named mental health worker, called a care coordinator, who is responsible for the [PATIENT](#) care under the care programme approach

~~There are two levels of care programme approach: standard and enhanced.~~

Each [Care Programme Approach Episode](#) must be subject to at least one [Care Programme Approach Review](#) and at least one [Care Programme Approach Care Co-ordinator Allocation](#). It may also be associated with one or more [Supervised Discharge Episodes](#) or one or more [Supervision Register Episodes](#).

Information recorded for a [Care Programme Approach Episode](#) includes:

## CARE PROGRAMME APPROACH REVIEW

---

Change to Supporting Information: Changed Description

[Care Programme Approach Review](#) is a [CARE CONTACT](#).

A clinical review of the health and social needs of a [PATIENT](#) who is the subject of a [Care Programme Approach Episode](#). The review may take the form of a single meeting of interested parties, usually including the allocated care coordinator and the [PATIENT](#) or it may comprise a series of meetings and discussions over a number of days. The [Care Programme Approach Review](#) ends when a definite outcome is established and recorded. The date when this is recorded will be taken as the [Care Programme Approach Review Date](#). The outcome will determine whether the [Care Programme Approach Episode](#) continues or is ended.

~~The review will also include the assessment and recording of the [HONOS SCORE](#) and the assessment or re-assessment of the need for a [Supervision Register Episode](#). The review will also include the assessment and recording of the Health of the Nation Outcome Scale and the assessment or re-assessment of the need for a [Supervision Register Episode](#).~~

## FACE TO FACE CONTACT SOCIAL WORKER (RETIRED)\_ renamed from FACE TO FACE CONTACT SOCIAL WORKER

---

Change to Supporting Information: Changed status to Retired, Description, Name

[Face To Face Contact Social Worker](#) is a [CARE CONTACT](#). This item has been retired from the NHS Data Model and Dictionary and it is no longer required for the Mental Health Minimum Data Set.

A face to face contact between a [PATIENT](#) subject to a [Mental Health Care Spell](#) and a [Local Authority](#) Social Services [Social Worker](#). The [Social Worker](#) may be a [Mental Health Care Team Member](#). When the contact involves the presence of more than one [Social Worker](#) at the same time, then it is still considered as a single occurrence of a face to face contact. [Mental Health Minimum Data Set \(Version 3\)](#) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

In the case of contact arising due to a [Social Services Statutory Assessment](#) then both the [Face To Face Contact Social Worker](#) and the [Social Services Statutory Assessment](#) will be recorded. See the [Clinical Data Sets Menu](#) for a link to the latest version of the data set.

When the [Social Worker](#) is also the allocated care programme approach care coordinator for the [PATIENT](#) then a [Face To Face Contact CPA Care Coordinator](#) should also be recorded. The last live version of the Mental Health Minimum Data Set (Version 3) is available in the January 2012 release of the NHS Data Model and Dictionary.

Information recorded for a [Face To Face Contact Social Worker](#) includes. Access to this version can be obtained by emailing [datastandards@nhs.net](mailto:datastandards@nhs.net) with "NHS Data Model and Dictionary - Archive Request" in the email subject line.

## MENTAL HEALTH MINIMUM DATA SET MESSAGE SCHEMA VERSIONS (RETIRED)\_ renamed from MENTAL HEALTH MINIMUM DATA SET MESSAGE SCHEMA VERSIONS

---

Change to Supporting Information: Changed status to Retired, Description, Name

The [Mental Health Minimum Data Set](#) will be collected from [Health Care Providers](#) via the [Secondary Uses Service](#) using the Mental Health Minimum Data Set-XML Message. The [Mental Health Minimum Data Set](#) data will be stored in the [Secondary Uses Service](#) enabling the [Department of Health](#) to produce routine reports. This item and the related documentation have been retired from the NHS Data Model and Dictionary and they are no longer required for the Mental Health Minimum Data Set.

XML is a markup language for data flows containing structured information and will meet Government standards in line with the [e-Government Interoperability Framework \(e-GIF\)](#) requirements. The last live version of this item is available in the January 2012 release of the NHS Data Model and Dictionary.

The schemas are published as .xsd files and are in zipped format. These are best viewed using XMLSPY or an equivalent XML viewer. Schema documentation as generated by XMLSPY is also available for download, this documentation may be viewed in most browsers.

A Schema Version Release Note file (in MS Word) is also included with the schema.

The following table sets out the approved versions of the [Mental Health Minimum Data Set](#) Message. To download a schema and its associated documentation, follow the hyperlink for the specific Message Version:

MHMDS Version	Message Format	Message Version	Available From	Mandated From	Usable To

## MENTAL HEALTH MINIMUM DATA SET OVERVIEW

Change to Supporting Information: Changed Aliases, Description

The [Mental Health Minimum Data Set](#) was introduced by [Data Set Change Notice 20/19/P13](#) in April 2000 in response to the lack of national clinical data collection in the mental health arena, in line with the information requirements of the emerging National Service Framework for Mental Health. The [Mental Health Minimum Data Set](#) was introduced by [Data Set Change Notice 20/19/P13](#) in April 2000 in response to the lack of national clinical data collection in the mental health arena, in line with the information requirements of the emerging National Service Framework for Mental Health.

Since April 2003 ([Data Set Change Notice 49/2002](#)) it has been a mandatory requirement that all Providers of specialist adult, including elderly, mental health services submit central [Mental Health Minimum Data Set](#) returns on a quarterly basis, with an additional annual submission. Since April 2003 ([Data Set Change Notice 49/2002](#)) it has been a mandatory requirement that all Providers of specialist adult, including elderly, mental health services submit central [Mental Health Minimum Data Set](#) returns on a quarterly basis, with an additional annual submission.

The [Mental Health Minimum Data Set](#) facilitates the collection of person-focussed clinical data and the sharing of such data to underpin the delivery of mental health care. The [Mental Health Minimum Data Set](#) facilitates the collection of person-focussed clinical data and the sharing of such data to underpin the delivery of mental health care. It is structured around the clinical process and includes an outcome assessment ([Health of the Nation Outcome Scale \(Working Age Adults\)](#), or [HoNOS \(Working Age Adults\)](#)). It records the key role played by partner agencies, particularly social services.

The [Mental Health Minimum Data Set](#) describes [Adult Mental Health Care Spells](#). The [Mental Health Minimum Data Set](#) describes [Adult Mental Health Care Spells](#). These comprise all interventions made for a [PATIENT](#) by a specialist [Adult Mental Health Care Team](#) from initial [REFERRAL REQUEST](#) to final discharge. For some individuals the [Adult Mental Health Care Spell](#) will comprise a short [Consultant Out-Patient Episode](#); for others it may extend over many years and include hospital, community, out-patient and day care episodes.

Information is collected relating to various stages in the journey of the [PATIENT](#), including activity such as [Hospital Provider Spells](#), [Consultant Out-Patient Episodes](#), community care, and NHS day care episodes; mental health reviews and assessments including Care Programme Approach (CPA) and [Health of the Nation Outcome Scale \(Working Age Adults\)](#) contacts with mental health professionals such as care co-ordinators, psychiatric [NURSES](#) and [CONSULTANTS](#); and also any diagnosis and treatment.

The prime purpose of the [Mental Health Minimum Data Set](#) is to provide local clinicians and managers with better quality information for clinical audit, and service planning and management. The prime purpose of the [Mental Health Minimum Data Set](#) is to provide local clinicians and managers with better quality information for clinical audit, and service planning and management.

Central collection provides improved national information, facilitating feedback to Trusts, and the setting of benchmarks. It will also allow the delivery of the National Service Framework for Mental Health priorities to be monitored.

The [Mental Health Minimum Data Set](#) data is collected from NHS funded providers of specialist mental health services and

submitted via the Bureau Services Portal provided by the Systems and Services Delivery (SSD) team at NHS Connecting For Health. **National Codes:** Mental Health Minimum Data Set (Version 3) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

01 Employed

- 02 Unemployed
- 03 Other employment status such as in education or training

Employed refers to those who are employed by a company and have their National Insurance paid for directly from their wages. It also includes those who are self-employed (i.e. those who work for themselves and generally pay their National Insurance themselves), those who are in supported employment, and those who are in permitted work (i.e. those who are in paid work and who are also receiving Incapacity Benefit). It should also include those who are unpaid family workers (i.e. those who do unpaid work for a business they own or for a business a relative owns). See the [Clinical Data Sets Menu](#) for a link to the latest version of the data set.

Unemployed refers to those who are not in paid work but are actively seeking work and are available to start, or are waiting to start a paid job they have already obtained. The last live version of the Mental Health Minimum Data Set (Version 3) is available in the January 2012 release of the NHS Data Model and Dictionary.

Other employment status such as education or training includes those who are economically inactive, that is, those who are not in paid work and who are not actively seeking work, or they are not available to start. It includes the following: Access to this version can be obtained by emailing [datastandards@nhs.net](mailto:datastandards@nhs.net) with "NHS Data Model and Dictionary - Archive Request" in the email subject line.

- Students who are undertaking full (at least 16 hours per week) or part-time (less than 16 hours per week) education or training and who are not working or actively seeking work
- The long-term sick or disabled, including those who are receiving Incapacity Benefit, income support or both, and who are not working or actively seeking work
- Those looking after the family or home and who are not working or actively seeking work
- Those who are not receiving benefits and who are not working or actively seeking work
- Those who are in unpaid voluntary work who are not working or actively seeking work
- Those of working age who have retired from paid work.

### Notes:

[CARE PROGRAMME APPROACH REVIEWS \(IN REPORTING PERIOD\)](#) is the same as [Care Programme Approach Review](#).

[CARE PROGRAMME APPROACH REVIEWS \(IN REPORTING PERIOD\)](#) is an optional data element in the [Mental Health Minimum Data Set](#) collection record and should only be present if one or more [Care Programme Approach Review](#) within the [Adult Mental Health Care Spell](#) has occurred during the [REPORTING PERIOD](#). This item has been retired from the NHS Data Model and Dictionary and it is no longer required for the Mental Health Minimum Data Set.

It is the total number of such reviews within the [Adult Mental Health Care Spell](#) which have occurred within the [REPORTING PERIOD](#). Each such review is recorded by a [Care Programme Approach Review](#) and there may be more than one recorded during the course of a [REPORTING PERIOD](#). Mental Health Minimum Data Set (Version 3) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

There is a [Care Programme Approach Review Date](#) for each [Care Programme Approach Review](#) and the calculation is based upon those reviews which have occurred during the [REPORTING PERIOD](#). See the [Clinical Data Sets Menu](#) for a link to the latest version of the data set.

The last live version of the Mental Health Minimum Data Set (Version 3) is available in the January 2012 release of the NHS Data Model and Dictionary.

Access to this version can be obtained by emailing [datastandards@nhs.net](mailto:datastandards@nhs.net) with "NHS Data Model and Dictionary - Archive Request" in the email subject line.

### Notes:

~~CARE SPELL IDENTIFIER (MENTAL HEALTH)~~ is the same as attribute ~~ACTIVITY IDENTIFIER~~.

The unique identifier of an ~~Adult Mental Health Care Spell~~ recorded when an ~~Adult Mental Health Care Spell~~ is initiated by a referral, or the temporary or permanent transfer of main responsibility for provision of mental health care for the ~~PATIENT~~ from another ~~Health Care Provider~~. This item has been retired from the NHS Data Model and Dictionary and it is no longer required for the Mental Health Minimum Data Set.

This is the ~~CARE SPELL IDENTIFIER~~ of an ~~Adult Mental Health Care Spell~~. Mental Health Minimum Data Set (Version 3) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

For purposes of the ~~Mental Health Minimum Data Set~~ collection, a ~~Mental Health Minimum Data Set~~ record will be assembled for each ~~Adult Mental Health Care Spell~~ of an adult (including elderly) ~~PATIENT~~ who has received a continuous period of care or assessment from a ~~Health Care Provider~~'s specialist mental health services within the ~~REPORTING PERIOD~~. Each MHMDS record will be separately identified, see ~~CARE SPELL NUMBER IN REPORTING PERIOD~~ for further details. See the ~~Clinical Data Sets Menu~~ for a link to the latest version of the data set.

~~CARE SPELL IDENTIFIER (MENTAL HEALTH)~~ is an optional data item note in the ~~Mental Health Minimum Data Set~~ record and should only be recorded where the ~~Health Care Provider~~ can initiate and maintain ~~Adult Mental Health Care Spell~~. The last live version of the Mental Health Minimum Data Set (Version 3) is available in the January 2012 release of the NHS Data Model and Dictionary.

Access to this version can be obtained by emailing [datastandards@nhs.net](mailto:datastandards@nhs.net) with "NHS Data Model and Dictionary - Archive Request" in the email subject line.

For purposes of the [Mental Health Minimum Data Set](#) collection, a [Mental Health Minimum Data Set](#) record will be assembled for each [Adult Mental Health Care Spell](#) of an adult (including elderly) [PATIENT](#) who has received a continuous period of care or assessment from a [Health Care Provider](#)'s specialist mental health services within the [REPORTING PERIOD](#). This item has been retired from the NHS Data Model and Dictionary and it is no longer required for the Mental Health Minimum Data Set.

[CARE\\_SPELL\\_NUMBER\\_IN\\_REPORTING\\_PERIOD](#) is the sequence number for the assembled [Adult Mental Health Care Spell](#) MHIMDS record among the set of assembled [Adult Mental Health Care Spell](#) MHIMDS records for the same [PATIENT](#) within the [REPORTING PERIOD](#). The [CARE\\_SPELL\\_NUMBER\\_IN\\_REPORTING\\_PERIOD](#) for the first assembled record based on earliest [Adult Mental Health Care Spell](#) in the [REPORTING PERIOD](#) will be recorded as 01 with it being incremented by 1 for each subsequent assembled record. For example if there are 3 assembled [Adult Mental Health Care Spell](#) for the [PATIENT](#) within the [REPORTING PERIOD](#) then the first would be recorded as 01, the second as 02 and the third as 03. Mental Health Minimum Data Set (Version 3) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

Use of [CARE\\_SPELL\\_NUMBER\\_IN\\_REPORTING\\_PERIOD](#) is an interim measure as not all [Health Care Providers](#) can initiate and maintain [Adult Mental Health Care Spells](#) and thus create and record unique [CARE\\_SPELL\\_IDENTIFIERS](#). ### Notes:

[CPA ENHANCED DAYS](#) is an optional data element in the [Mental Health Minimum Data Set](#) collection record and should only be present if one or more [Start Dates](#) with [CARE PROGRAMME APPROACH LEVEL](#) National Code 2 'Enhanced, multiple needs, including housing, employment etc, which requires inter-agency coordination' has occurred during the [REPORTING PERIOD](#):

It is the total number of [CPA ENHANCED DAYS](#) within the [Adult Mental Health Care Spell](#) within the [REPORTING PERIOD](#). Each period of [CPA ENHANCED DAYS](#) is recorded by a [Care Programme Approach Episode](#) and there may be more than one such episode during the course of an [Adult Mental Health Care Spell](#). This item has been retired from the NHS Data Model and Dictionary and it is no longer required for the Mental Health Minimum Data Set.

There is a [Start Date](#) and [End Date](#) for each [Care Programme Approach Episode](#) and the calculation is based upon those [CPA ENHANCED DAYS](#) which have occurred during the [REPORTING PERIOD](#) adjusted for where periods of [CPA ENHANCED DAYS](#) overlap the [REPORTING PERIOD START DATE](#) and/or [REPORTING PERIOD END DATE](#) (this includes where the period of [CPA ENHANCED DAYS](#) has not yet ended). Where such overlaps occur the [REPORTING PERIOD START DATE](#) and/or [REPORTING PERIOD END DATE](#) should be used instead of that of the [Care Programme Approach Episode](#). Mental Health Minimum Data Set (Version 3) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

[CPA ENHANCED DAYS](#) is the sum of the calculated periods of [CPA ENHANCED DAYS](#) and should be recorded left justified with leading zeros. See the [Clinical Data Sets Menu](#) for a link to the latest version of the data set.

Please note that although both [CPA ENHANCED DAYS](#) and [CPA STANDARD DAYS](#) are classed as optional data elements at least one of them should be present within the [Mental Health Minimum Data Set](#) collection record as Care Programme Approach is mandatory. A [PATIENT](#) subject to an [Adult Mental Health Care Spell](#) therefore should always have recorded CPA days with only the [CARE PROGRAMME APPROACH LEVEL](#) varying during the period of the [Adult Mental Health Care Spell](#). Mental Health Minimum Data Set (Version 3) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

For purposes of the ~~Mental Health Minimum Data Set~~ collection, the twelve most recent ~~PATIENT DIAGNOSES~~ in chronological ascending sequence are required and these may have been recorded in one or more ~~Care Programme Approach Review~~. See the [Clinical Data Sets Menu](#) for a link to the latest version of the data set.

For example if the latest ~~Care Programme Approach Review~~ within an ~~Adult Mental Health Care Spell~~ recorded 7 ~~PATIENT DIAGNOSES~~ and the previous ~~Care Programme Approach Review~~ recorded 8 ~~PATIENT DIAGNOSES~~ then: The last live version of the Mental Health Minimum Data Set (Version 3) is available in the January 2012 release of the NHS Data Model and Dictionary.

~~DIAGNOSIS (ICD FIRST MOST RECENT)~~ would be the first of the 7 latest recorded  
~~DIAGNOSIS (ICD SECOND MOST RECENT)~~ would be the second of the 7 latest recorded  
~~DIAGNOSIS (ICD THIRD MOST RECENT)~~ would be the third of the 7 latest recorded  
~~DIAGNOSIS (ICD FOURTH MOST RECENT)~~ would be the fourth of the 7 latest recorded  
~~DIAGNOSIS (ICD FIFTH MOST RECENT)~~ would be the fifth of the 7 latest recorded  
~~DIAGNOSIS (ICD SIXTH MOST RECENT)~~ would be the sixth of the 7 latest recorded  
~~DIAGNOSIS (ICD SEVENTH MOST RECENT)~~ would be the seventh of the 7 latest recorded  
~~DIAGNOSIS (ICD EIGHTH MOST RECENT)~~ would be the first of the 8 previously recorded  
~~DIAGNOSIS (ICD NINTH MOST RECENT)~~ would be the second of the 8 previously recorded  
~~DIAGNOSIS (ICD TENTH MOST RECENT)~~ would be the third of the 8 previously recorded  
~~DIAGNOSIS (ICD ELEVENTH MOST RECENT)~~ would be the fourth of the 8 previously recorded  
~~DIAGNOSIS (ICD TWELFTH MOST RECENT)~~ would be the fifth of the 8 previously recorded

This is an optional data element in the [Mental Health Minimum Data Set](#) collection record and should only be recorded if one or more [Legal Status](#) were present during or overlap with the [REPORTING PERIOD](#). It is the highest scored [LEGAL STATUS RESTRICTIVENESS](#) of all the [Legal Status](#) for the [PATIENT](#) within the [Adult Mental Health Care Spell](#) during the [REPORTING PERIOD](#). Mental Health Minimum Data Set (Version 3) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

If the [PATIENT](#) has more than one [Adult Mental Health Care Spell](#) during the same [REPORTING PERIOD](#) and therefore more than one MHMDS collection record, then the same highest restrictive [MENTAL HEALTH ACT LEGAL STATUS CLASSIFICATION CODE](#) will apply for all the MHMDS collection records for the [PATIENT](#) within the same [REPORTING PERIOD](#). See the [Clinical Data Sets Menu](#) for a link to the latest version of the data set.

Where more than one [Legal Status](#) has the same [LEGAL STATUS RESTRICTIVENESS](#), then the first recorded one should be used. The last live version of the Mental Health Minimum Data Set (Version 3) is available in the January 2012 release of the NHS Data Model and Dictionary.

**Notes:**

~~SSSA (NUMBER FOR COMMUNITY CARE)~~ is an optional data element in the ~~Mental Health Minimum Data Set~~ collection record and should only be present if one or more ~~Social Services Statutory Assessments~~ with a ~~STATUTORY ASSESSMENT TYPE~~ classification of b.ii: 'Assess to establish patient's need for community care' have occurred during the ~~REPORTING PERIOD~~. This item has been retired from the NHS Data Model and Dictionary and it is no longer required for the Mental Health Minimum Data Set.

It is the total number of such assessments for community care within the ~~REPORTING PERIOD~~. Each such assessment is recorded by a ~~Social Services Statutory Assessment~~ and there may be more than one recorded during the course of a ~~REPORTING PERIOD~~. Mental Health Minimum Data Set (Version 3) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

There is a ~~Statutory Assessment Date~~ for each ~~Social Services Statutory Assessment~~ and the calculation is based upon those assessments for community care which have occurred during the ~~REPORTING PERIOD~~. See the ~~Clinical Data Sets Menu~~ for a link to the latest version of the data set.

If the ~~PATIENT~~ has more than one ~~Adult Mental Health Care Spell~~ during the same ~~REPORTING PERIOD~~ and therefore more than one ~~Mental Health Minimum Data Set~~ collection record, then the same ~~SSSA (NUMBER FOR COMMUNITY CARE)~~ will apply for all the ~~Mental Health Minimum Data Set~~ collection records for the ~~PATIENT~~ within the same ~~REPORTING PERIOD~~. The last live version of the Mental Health Minimum Data Set (Version 3) is available in the January 2012 release of the NHS Data Model and Dictionary.

~~Social Services Statutory Assessment~~ is a ~~CARE CONTACT~~ where the ~~CARE CONTACT TYPE~~ is National Code 31 '~~Social Services Statutory Assessment~~'. ## **SUSPENDED DAYS IN REPORTING PERIOD (RETIRED)\_ renamed from SUSPENDED DAYS IN REPORTING PERIOD**

---

Change to Data Element: Changed status to Retired, Description, Name

Format/length:	n3
HES item:	
National Codes:	
Default Codes:	

### **Notes:**

~~SUSPENDED DAYS IN REPORTING PERIOD~~ is an optional data element in the Mental Health Minimum Dataset (MHMDS) collection record and should only be present if one or more ~~Mental Health Care Spell Suspensions~~ have occurred during the ~~REPORTING PERIOD~~. This item has been retired from the NHS Data Model and Dictionary and it is no longer required for the Mental Health Minimum Data Set.

It is the total number of suspended days of the ~~Adult Mental Health Care Spell~~ within the ~~REPORTING PERIOD~~. Each period of suspension is recorded by a ~~Mental Health Care Spell Suspension~~ and there may be more than one such suspension during the course of an ~~Adult Mental Health Care Spell~~. Mental Health Minimum Data Set (Version 3) has been retired from the NHS Data Model and Dictionary as at 01 April 2011.

There is an ~~ACTIVITY SUSPENSION START DATE~~ and ~~ACTIVITY SUSPENSION END DATE~~ for each ~~Mental Health Care Spell Suspension~~ and the calculation is based upon those periods of suspension which have occurred during the ~~REPORTING PERIOD~~ adjusted for where periods of suspension overlap the ~~REPORTING PERIOD START DATE~~ and/or ~~REPORTING PERIOD END DATE~~ (this includes where the period of suspension has not yet ended). Where such overlaps occur the ~~REPORTING PERIOD START DATE~~ and/or ~~REPORTING PERIOD END DATE~~ should be used instead of that of the ~~ACTIVITY SUSPENSION START DATE~~ and/or ~~ACTIVITY SUSPENSION END DATE~~ of the ~~Mental Health Care Spell Suspension~~. See the [Clinical Data Sets Menu](#) for a link to the latest version of the data set.

~~SUSPENDED DAYS IN REPORTING PERIOD~~ is the sum of the calculated periods of suspension and should be recorded left justified with leading zeros. The last live version of the Mental Health Minimum Data Set (Version 3) is available in the January 2012 release of the NHS Data Model and Dictionary.

~~Mental Health Care Spell Suspension~~ is an ~~ACTIVITY SUSPENSION~~ where ~~ACTIVITY SUSPENSION TYPE~~ is National Code 04 'Mental Health Care Spell Suspension'. Access to this version can be obtained by emailing [datastandards@nhs.net](mailto:datastandards@nhs.net) with "NHS Data Model and Dictionary - Archive Request" in the email subject line.

~~Adult Mental Health Care Spell~~ is an ~~ACTIVITY GROUP~~ where ~~ACTIVITY GROUP TYPE~~ is National Code 23 'Adult Mental Health Care Spell'.
