Type:	Data Dictionary Change Notice
Reference:	1414
Version No:	1.0
Subject:	Retirement of Standards - DSCNs 03/99/P03, 10/2002, 12/99/A04, 20/98/A03, 30/98/P21, 35/99/P25, 37/97/P24 and 43/97/P29
Effective Date:	1 April 2014
Reason for Change:	Retirement of Data Standards
Publication Date:	25 February 2014

Background:

The Information Standards Board for Health and Social Care (ISB) has conducted a review of all Data Set Change Notices (DSCNs) and Information Standards Notices (ISNs) issued since 1987, to update its portfolio of standards prior to the handover of responsibility to NHS England, the Health and Social Care Information Centre (HSCIC) and Public Health England.

This review has identified a number of data standards in the NHS Data Model and Dictionary which have been superseded or are no longer in use.

This Data Dictionary Change Notice (DDCN) retires the items in the NHS Data Model and Dictionary in line with the retirement of the following Data Set Change Notices, as listed on the ISB [Advanced Notification - Withdrawal](#) issued 26/09/13:

- DSCN 03/99/P03 - Data Standards: Common Information Core 1999/2000
- DSCN 10/2002 - Data Standards: Radiotherapy treatments
- DSCN 12/99/A04 - Data Standards: GP Retainer Scheme and GP Contracts
- DSCN 20/98/A03 - Data Standards: Change of Notation
- DSCN 30/98/P21 - Data Standards: Minor Changes to Data Standards
- DSCN 35/99/P25 - Data Standards: Common Information Core 2000/ 2001
- DSCN 37/97/P24 - Data Standards: Minor Changes to Data Standards
- DSCN 43/97/P29 - Data Standards: Common Information Core 1998/99 Changes

ABOUT THE NHS DATA MODEL AND DICTIONARY VERSION 3

Change to Supporting Information: Changed Description

Following the issue of [DSCN 07/2004 'Data Standards: Meta Model'](#), the NHS Data Model and Dictionary was changed to reflect and be based upon a more generic logical data model which better supports the strategic way forward. This NHS Data Model and Dictionary was published as the NHS Data Model and Dictionary Version 3.

There was extensive quality assurance of Version 3 including involvement of the Data Definition Group. All

Version 3 contents were cross mapped and checked to ensure consistency with the Version 2 contents. Version 3 superseded Version 2 on 1st May 2005.

Version 3 supports all the messages, data sets and central returns supported by Version 2 but the underlying structure was genericised. No changes were made to NHS Business Definitions.

Version 3 introduced a new Generic Model which is '[PERSON](#)' based' rather than '[ORGANISATION](#)' based'. ~~The model has been developed around generic '[CARE ACTIVITY](#)' for a [PATIENT](#) at '[SERVICE POINT](#)' facility or [LOCATION](#) with each event transaction being recorded.~~ The model has been developed around generic '[CARE ACTIVITY](#)' for a [PATIENT](#), with each event transaction being recorded. This has involved grouping many of the old classes into generic classes like [ACTIVITY GROUP](#). However, none of the detail or approved definitions or value sets in Version 2 have been lost although some of the old class definitions will now be found in the new 'NHS Business Definitions'.

[The NHS Data Dictionary Version 2](#) has been frozen and made available for archive information purposes only and has been watermarked accordingly. All changes to NHS information standards and the supporting [Data Set Change Notices](#) are now consistent only with Version 3.

Summary of main changes and enhancements incorporated within Version 3

- Introduction of the capability of holding Retired Items
- Introduction of NHS Business Definitions, which allow specific business areas to be defined in a more flexible manner
- New 'All Items Index' which lists all the contents held within the NHS Data Model and Dictionary
- Reduction in the number of data model diagrams making them more comprehensible
- Introduction of Domains, which are conceptual logical modelling objects which identify the logical format, length and value set attributable to one or more attribute(s)
- 'Where Used' list expanded to include a description of usage column
- Creation of a separate Meta Model area within the publication

The introduction of Version 3 had no impact on current information standards or system suppliers.

About the Generic Model

The Generic Model supports all the messages, data sets and central returns which the model supported but the underlying structure has been genericised. This involved grouping many of the old classes into generic classes like [ACTIVITY GROUP](#). However, none of the detail was lost and most of the old class definitions can be found under 'NHS Business Definitions'. The number of diagrams has been greatly reduced and they now describe coherent areas of the model which is a far more useful approach for data modellers.

This has led to the creation of a new Generic Model which is '[PERSON](#)' based' rather than '[ORGANISATION](#)' based'. ~~The model has been developed around generic '[CARE ACTIVITY](#)' for a [PATIENT](#) at '[SERVICE POINT](#)' point' facility or location with each event transaction being recorded.~~ The model has been developed around generic '[CARE ACTIVITY](#)' for a [PATIENT](#), each event transaction being recorded.

The model is aimed at enabling all '[CARE ACTIVITIES](#)' related to the same condition for the same [PATIENT](#) to be recorded and linked across [ORGANISATIONS](#). The different states of the same '[CARE ACTIVITY](#)' are recorded as event transactions e.g. requested, intended, scheduled, provided, cancelled, etc. These different state events also drive the scheduling and capacity planning of resources (people, equipment, facilities, etc.) to deliver the care.

Although this may seem complicated, it is necessary both to form a coherent logical model and to relate physical information such as that which flows on the Data Sets to the logical model. Every physical item should be represented logically in the NHS Data Model and Dictionary. However, the scope of the logical model is greater than the physical information it holds and therefore not all logical information has a physical existence.

APPOINTMENT REQUEST

Change to Supporting Information: Changed Description

An [Appointment Request](#) is a type of [SERVICE REQUEST](#) for an [APPOINTMENT](#).

Each originating request may result in one or more [APPOINTMENT OFFERS](#), the originating request may be from:

- a [PATIENT](#) self-referral [REFERRAL REQUEST](#)
- a [REFERRAL REQUEST](#) from one [ORGANISATION](#) or [CARE PROFESSIONAL](#) to another [ORGANISATION](#) or [CARE PROFESSIONAL](#)
- follow up to a previous [APPOINTMENT](#) at which attendance or contact has taken place related to the same [REFERRAL REQUEST](#)
- an [APPOINTMENT](#) at which attendance did not take place for whatever reason, requiring a new [APPOINTMENT](#) to be made
- an invitation for an [APPOINTMENT](#) as part of a [HEALTH PROGRAMME](#)
- an [ACTIVITY](#) which requires an [APPOINTMENT](#) to be made for further care or treatment.

~~Each [Appointment Request](#) should be reviewed by the receiving [CARE PROFESSIONAL](#), [ORGANISATION](#) or [SERVICE POINT](#) to decide whether an offer of an [APPOINTMENT](#) should be made.~~ Each [Appointment Request](#) should be reviewed by the receiving [CARE PROFESSIONAL](#), [ORGANISATION](#) or [SERVICE](#) to decide whether an offer of an [APPOINTMENT](#) should be made. [DECISION TO OFFER AN APPOINTMENT DATE](#) records the date the decision was made to offer an [APPOINTMENT](#).

It is on this date it is considered that the [PATIENT](#) has been added to the [Out-Patient Waiting List](#) for the [APPOINTMENT](#) with the expectation that it will take place.

When it is decided that an offer of an [APPOINTMENT](#) should be made then one or more [APPOINTMENT OFFER](#) should be offered each of which will record a separate and different [APPOINTMENT DATE OFFERED](#) and [APPOINTMENT TIME OFFERED](#) to the [PATIENT](#).

The [APPOINTMENT DATE OFFERED](#) and [APPOINTMENT TIME OFFERED](#) of the [APPOINTMENT OFFER](#) equate to the allocated [APPOINTMENT SLOT](#).

When more than one date is offered for the same [Appointment Request](#), the [PATIENT](#) can choose which date and time to accept. [APPOINTMENT ACCEPTED DATE](#) records whether the offer has been accepted. When multiple dates are offered, the [PATIENT](#) should only be allowed to select one of them.

The [SERVICE REQUEST DATE](#) and [SERVICE REQUEST TIME](#) will also be the default created and recorded date and time for each [APPOINTMENT OFFER](#) made for the [Appointment Request](#).

FRACTION

Change to Supporting Information: Changed Description

A [Fraction](#) is a [CLINICAL INTERVENTION](#).

A [Fraction](#) is a set of exposures delivered or intended to be delivered to a [PATIENT](#) in the course of one visit to a [Radiotherapy](#) room. The [HELD OR CANCELLED](#) indicator records those [Fractions](#) for which [APPOINTMENTS](#) have

been made, but which did not take place.

~~Note: For technical reasons the [Radiotherapy MACHINE TYPE](#) actually used for each [EXPOSURE](#) may differ from that indicated when the [Fraction](#) was planned.~~
Note: For technical reasons the [Radiotherapy MACHINE TYPE](#) actually used for each exposure may differ from that indicated when the [Fraction](#) was planned.

HOSPITAL SITE

Change to Supporting Information: Changed Description

A [Hospital Site](#) is an [ORGANISATION SITE](#).

A [Hospital Site](#) is an [ORGANISATION SITE](#) that is a hospital. It should contain at least one [Hospital Bed](#) routinely used by [PATIENTS](#) overnight. However, a dental hospital which does not have [Hospital Beds](#) routinely used by [PATIENTS](#) overnight may be classified as a [Hospital Site](#) if it includes at least one [Hospital Bed](#) routinely used by [PATIENTS](#) by day. A hospital is an establishment for which the main purpose is to provide medical or psychiatric treatment for illness or mental disorder or [Palliative Care](#). [PATIENTS](#) may have a [Hospital Stay](#) at a [Hospital Site](#), as a result of one or more [ELECTIVE ADMISSION LIST ENTRIES](#).

~~A hospital has an organisational hierarchy of [SERVICE POINTS](#). Each [SERVICE POINT](#) serves a specific function and uses accommodation, equipment and money to provide residential care or allied and supporting services for [PATIENTS](#).~~

A hospital which provides high security psychiatric services in high security accommodation for [PATIENTS](#) liable to be detained in hospital under provisions of the Mental Health Act 1983, who require treatment under conditions of special security on account of their dangerous, violent or criminal propensities, must be part of an [NHS Trust](#) approved by the Secretary of State for the purpose of providing such services.

Any establishment in which treatment or nursing (or both) are provided for [PERSONS](#) liable to be detained under the Mental Health Act 1983 is a [Hospital Site](#).

The [Hospital Site](#) may or may not be classed as an NHS site.

MUTUALLY EXCLUSIVE RELATIONSHIPS

Change to Supporting Information: Changed Description

~~In some situations, [Relationships](#) may be Mutually Exclusive, i.e. either one or other Relationship may be present, but not both.~~

~~For example, a particular [SERVICE REQUEST](#) may relate to either a [CARE PROFESSIONAL ORGANISATION](#) or a [SERVICE POINT](#) not both at the same time.~~

~~This 'either/or' situation is shown by a line spanning the Relationships in question.~~

~~An example of Mutually Exclusive Relationships in diagrams is given below.~~

MUTUALLY EXCLUSIVE RELATIONSHIPS - REDUCED ARC

Change to Supporting Information: Changed Description

In some diagrams only one of the Mutually Exclusive Relationships may be present, the other, being not applicable to the diagram, being omitted.

For example, a particular diagram is concerned with SERVICE REQUESTS and requires the inclusion of SERVICE POINT, however, the second Mutually Exclusive Relationship to CARE PROFESSIONAL ORGANISATION is not relevant to the diagram and can be left out.

This omission is indicated by the straight line (arc) which normally spans the two Relationships being displayed in a reduced manner.

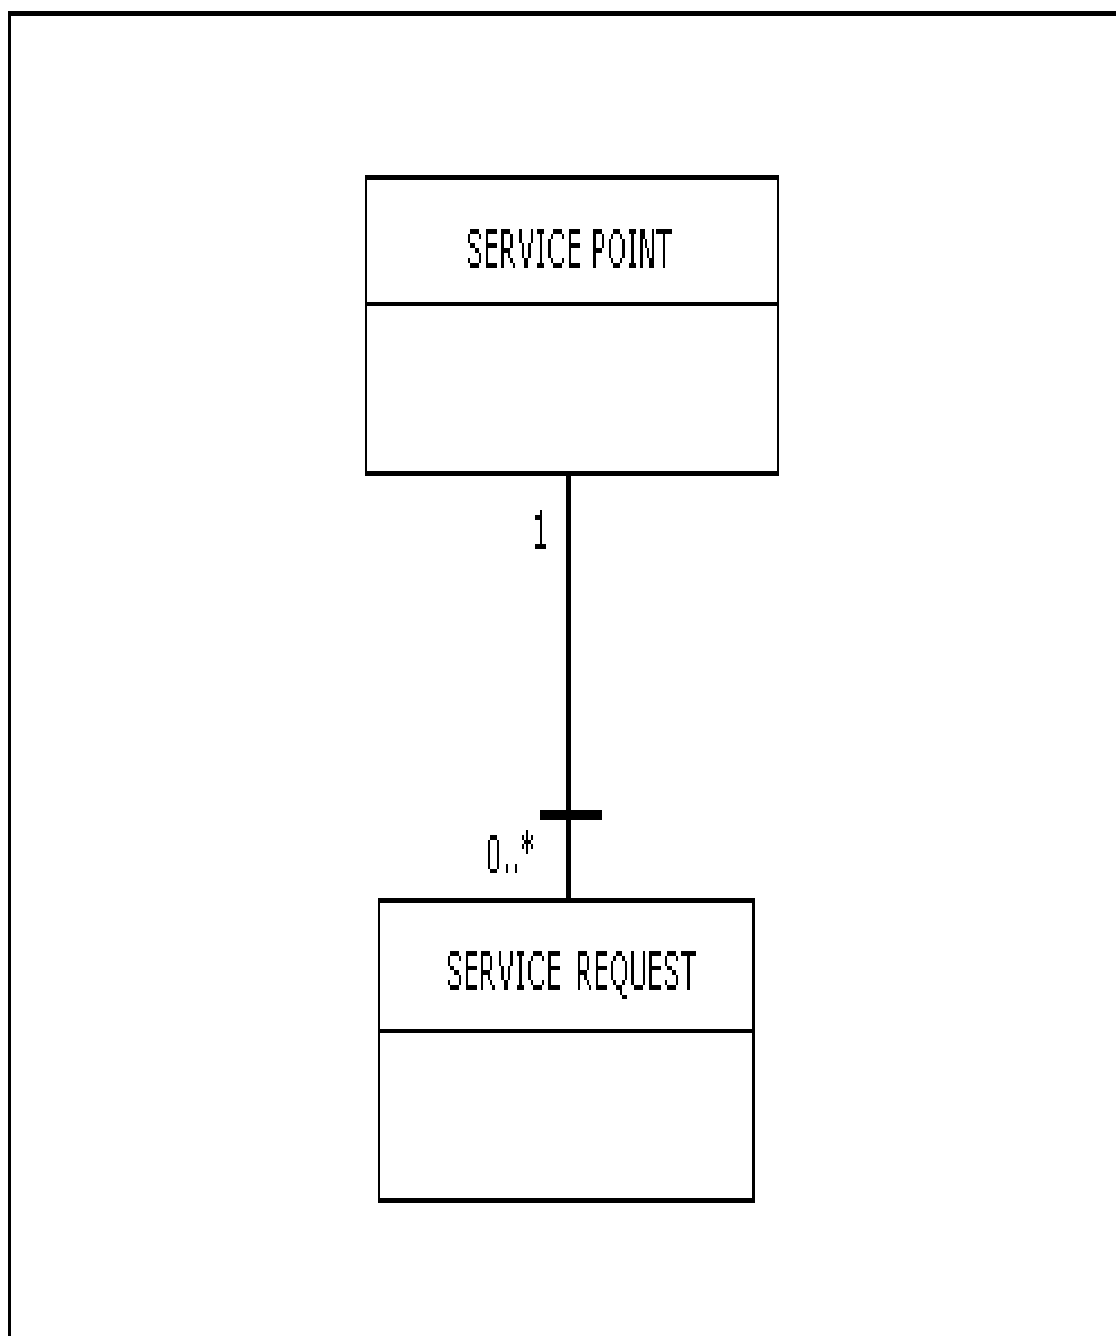

An example of a Reduced Mutually Exclusive Relationship Arc in diagrams is given below:

CLINIC OR FACILITY

Change to Class: Changed Description, Attributes

An administrative arrangement enabling [PATIENTS](#) to see or be in contact with [CARE PROFESSIONALS](#). ~~The [CLINIC OR FACILITY](#) should always relate to an identified [SERVICE POINT](#) within an [ORGANISATION](#). The [CLINIC OR FACILITY](#) should always relate to an identified [SERVICE](#) within an [ORGANISATION](#).~~

~~[CLINIC OR FACILITY ADMINISTRATIVE TYPE](#) classifies the administrative arrangement for the [CLINIC OR FACILITY](#) and whether it is a physical or virtual [SERVICE POINT](#) or combination of both.~~

Clinics are mainly [Out-Patient Clinics](#) for [PATIENTS](#) to receive consultation, tests, assessment, diagnosis, treatment or care without the need to be admitted.

A [Day Care Facility](#) is provided for the clinical treatment, assessment and maintenance of function of [PATIENTS](#), in particular, though not exclusively, those who are elderly, mentally ill or have learning difficulties. They may be called Day Hospitals, Centres, Facilities or Units.

A [Day Care Facility](#) may be financed, planned and run solely by NHS [ORGANISATIONS](#) or solely by non-NHS [ORGANISATIONS](#) or jointly between NHS and non-NHS [ORGANISATIONS](#). Jointly run facilities should still be managed by only one [ORGANISATION](#).

The facilities specifically do not have [Hospital Beds](#) and function separately from any [WARD](#).

A [Day Care Facility](#) is usually open during the five week days. In some places a service may be provided only once or twice a week and the [SERVICE](#) may take the form of evening or weekend sessions.

Change to Class: Changed status to Retired, Description, Name, Attributes, Relationships

~~A single occasion on which either a [PATIENT](#) is positioned and exposed to ionizing radiation or ionizing radiation is released for checking, calibration, etc, when no [PATIENT](#) is present.~~ **This item has been retired from the NHS Data Model and Dictionary.**

~~[Health Care Providers](#) must record the number of 'treatment exposures and check films' for each type of treatment machine. When a treatment exposure and check film occur simultaneously they should be counted as one exposure. [Health Care Providers](#) may also wish to record the number of exposures for calibration and quality control.~~ **The last live version of this item is available in the February 2014 release of the NHS Data Model and Dictionary.**

~~It should be noted that.~~ **Access to this version can be obtained by emailing information.standards@hscic.gov.uk with "NHS Data Model and Dictionary - Archive Request" in the email subject line.**

a. If a machine switches itself off during the exposure and it can be restarted immediately from the control panel, this constitutes one exposure.

b. If a machine switches itself off during the exposure and before being restarted the [Radiographer](#) has to enter the room to re-adjust the equipment, this should be counted as two exposures.

c. If a [PATIENT](#) becomes distressed during an exposure necessitating turning off the machine and the [Radiographer](#) has to enter the room before re-starting, this should be counted as two exposures. For total body radiation, a long exposure may be required which should be identified as such. For reporting purposes these should be counted as 20 exposures for each hour of the procedure.

~~National Codes:~~

~~01 **Static physical service point:**~~

~~The clinic or facility is a static physical [SERVICE POINT](#) site of an Organisation where patient appointments are made and patients attend the site for the appointment to be seen by the appropriate care professionals.~~

~~In exceptional circumstances the care professional may journey to where the patient is currently located due to the patient not being able to attend the physical site but this must be the exception and not the general rule.~~

~~02 **Mobile physical service point:**~~

~~The clinic or facility is a mobile physical [SERVICE POINT](#) unit of an Organisation where patient appointments are made and patients attend the mobile unit for the appointment to be seen by the appropriate care professionals.~~

~~A mobile unit may travel to different geographical areas but will be static for the period of the organised clinic or facility SESSIONS.~~

~~03 **Combined static and mobile physical service point:**~~

~~The clinic or facility is a [SERVICE POINT](#) which combines a static and mobile physical sites of an Organisation where patient appointments are made and patients attend the static site or mobile unit for the appointment to be seen by the appropriate care professionals.~~

~~04 **Virtual clinic service point:**~~

~~The clinic does not physically exist but is an administrative [SERVICE POINT](#). This is to enable contact with patients to be made without need for the patient to attend a physical static or mobile site.~~

~~This includes care activities which are normally delivered by the care professionals by telephone or other form of remote contact and where the care professionals normally visit patients for a face to face contact care delivery.~~

~~This type of clinic allows lists, sessions, appointments, consultations and contacts etc., to be set up, managed and administered in exactly the same way as for physical clinics.~~

05 **Combined static physical and virtual clinic service point.**

The clinic is a [SERVICE POINT](#) which combines a static physical site where patient appointments are made and patients attend the site for the appointment to be seen by the appropriate care professionals and virtual clinic capabilities where care activities can be delivered by the care professionals by telephone or other form of remote contact and where the care professionals normally visit patients for a face to face contact care delivery.

To qualify as this type of clinic the combination of the physical and virtual capabilities must be normal practice and not that one or other can occur under exceptional circumstances
