ADULT MENTAL HEALTH CARE CLUSTER

Change to Supporting Information: Changed Description

An Adult Mental Health Care Cluster is a type of CARE CLUSTER for adult PATIENTS.

An Adult Mental Health Care Cluster is part of a currency developed to support the National Tariff Payment System for Mental Health Services.

Adult Mental Health Care Clusters are 21 groupings of Mental Health PATIENTS based on their characteristics, and are a way of classifying individuals utilising Mental Health Services that forms the basis for payment.

An Adult Mental Health Care Cluster is assigned using a decision tree or algorithm based on the PERSON SCORE from the Adult Mental Health Clustering Tool undertaken by a CARE PROFESSIONAL for the PATIENT.

This is done by first assigning the PATIENT to one of three Mental Health Care Cluster Super Classes, to narrow down the number of possible Adult Mental Health Care Clusters which are applicable to the PATIENTS condition. The PATIENT is then assigned to the most appropriate of this sub-set of Adult Mental Health Care Clusters.

~~Further information relating to the Adult Mental Health Clustering Tool and Adult Mental Health Care Clusters is available from the Monitor part of the gov.uk website at: Guidance on mental health currencies and payment.~~Further information relating to the Adult Mental Health Clustering Tool and Adult Mental Health Care Clusters is available from the gov.uk website at: The NHS payment system: documents and guidance.

ADULT MENTAL HEALTH CLUSTERING TOOL

Change to Supporting Information: Changed Description

The Adult Mental Health Clustering Tool is a type of Clustering Tool for adult PATIENTS receiving Mental Health care.

The Adult Mental Health Clustering Tool is a needs assessment tool designed to rate the care needs of a PATIENT, based upon a series of 18 rating scales.

The first 12 of these rating scales are the same as the Health of the Nation Outcome Scale (Working Age Adults) rating scales, originally developed by the Royal College of Psychiatrists. These 12 rating scales are numbered 1 - 12 under 'Current Ratings' in the Adult Mental Health Clustering Tool.

One additional 'current' rating and a new section relating to historical ratings have also been added, to form the Adult Mental Health Clustering Tool. These items are referred to as the Summary Assessment of Characteristics (SAC) items.

Part 1: Current Ratings

These ratings relate to the most severe occurrence in the two weeks prior to the Adult Mental Health Clustering Tool ASSESSMENT TOOL COMPLETION DATE.

1. Overactive, aggressive, disruptive or agitated behaviour (current)
2. Non-accidental self injury (current)
3. Problem drinking or drug taking (current)
4. Cognitive problems (current)
5. Physical illness or disability problems (current)
6. Problems associated with hallucinations and delusions (current)
7. Problems with depressed mood (current)
8. Other mental and behavioural problems (current), qualified by specific disorders: and the alphabetical list of headings from the glossary:

> A Phobic
> B Anxiety
> C Obsessive-compulsive
> D Stress
> E Dissociative
> F Somatoform
> G Eating
> H Sleep
> I Sexual
> J Other

9. Problems with relationships (current)
10. Problems with activities of daily living (current)
11. Problems with living conditions (current)
12. Problems with occupation and activities (current)
13. Strong unreasonable beliefs occurring in non-psychotic disorders only (current)

Part 2: Historical Ratings

These ratings relate to problems that occur in an episodic or unpredictable way, from a more 'historical' perspective. Whilst there may not be any direct observation or report of a manifestation during the two weeks prior to the Adult Mental Health Clustering Tool ASSESSMENT TOOL COMPLETION DATE, the evidence and clinical judgement would suggest that there is still a cause for concern that cannot be disregarded. In these circumstances, any event that remains relevant to the current CARE PLAN should be included.

A. Agitated behaviour / expansive mood (historical)
B. Repeat self-harm (historical)
C. Safeguarding children and vulnerable dependant adults (historical)
D. Engagement (historical)
E. Vulnerability (historical)

The allowed responses to each of the 18 items in the Adult Mental Health Clustering Tool are:

- 0 - No problem
- 1 - Minor problem requiring no action
- 2 - Mild problem but definitely present
- 3 - Moderately severe problem
- 4 - Severe to very severe problem
- 9 - Not known

The PERSON SCORE from the Adult Mental Health Clustering Tool is used to allocate the PATIENT to the most appropriate Adult Mental Health Care Cluster.

Further information relating to the Adult Mental Health Clustering Tool and Adult Mental Health Care Clusters is available from the Monitor part of the gov.uk website at: Guidance on mental health currencies and payment. Further information relating to the Adult Mental Health Clustering Tool and Adult Mental Health Care Clusters is available from the gov.uk website at: The NHS payment system: documents and guidance.

DEPARTMENT OF HEALTH

Change to Supporting Information: Changed Description

The Department of Health (DH) is an Organisation.

The Department of Health helps people to live better for longer. They lead, shape and fund health and care in England, making sure people have the support, care and treatment they need, with the compassion, respect and dignity they deserve.

For further information on the Department of Health, see the Department of Health part of the gov.uk website.

A new health and care system became fully operational from 1 April 2013 to deliver the ambitions set out in the Health and Social Care Act 2012.

To achieve this, the Department of Health is supported by a number of agencies and public bodies, including:

- Care Quality Commission
- Health Education England
- Health Research Authority
- ~~Monitor~~
- National Institute for Health and Care Excellence
- NHS Digital
- NHS England
- NHS Business Services Authority
- ~~NHS Trust Development Authority~~

- has the power to recommend that action is taken by the Care Quality Commission (CQC) when there are concerns about health and social care services.

For further information on Healthwatch England, see the:

- Care Quality Commission website at: Healthwatch
- Healthwatch website.

MENTAL HEALTH CARE CLUSTER SUPER CLASS

Change to Supporting Information: Changed Description

A Mental Health Care Cluster Super Class is identified during the process of assigning a Adult Mental Health Care Cluster to a PATIENT. A Mental Health Care Cluster Super Class is identified during the process of assigning an Adult Mental Health Care Cluster to a PATIENT.

A Mental Health Care Cluster Super Class enables the number of applicable Adult Mental Health Care Clusters to be narrowed down, by deciding if the origin of the presenting condition is primarily:

- Non-psychotic
- Psychotic or
- Organic

If the PATIENT cannot be assigned to a Adult Mental Health Care Cluster, MENTAL HEALTH CARE CLUSTER SUPER CLASS CODE is recorded as '*Unable to assign* PATIENT *to Mental Health Care Cluster Super Class*'. If the PATIENT cannot be assigned to an Adult Mental Health Care Cluster, MENTAL HEALTH CARE CLUSTER SUPER CLASS CODE is recorded as '*Unable to assign* PATIENT *to Mental Health Care Cluster Super Class*'. The PATIENT will automatically be assigned to the ADULT MENTAL HEALTH CARE CLUSTER CODE '*00 Care Cluster 0 - Variance (unable to assign ADULT MENTAL HEALTH CARE CLUSTER CODE).*'

Further information relating to the Adult Mental Health Clustering Tool and Adult Mental Health Care Clusters is available from the Monitor part of the gov.uk website at: Guidance on mental health currencies and payment.
