PHARMACY PREMISES

Change to Supporting Information: Changed Description

A Pharmacy Premises can be an ORGANISATION and an ORGANISATION SITE.

A Pharmacy Premises is a location where medicinal drugs are dispensed and sold.

General Pharmaceutical Council Registration of Pharmacy Premises:

The General Pharmaceutical Council (GPhC) maintains a register of Pharmacy Premises if the principal activity at the premises is the retail sale or supply of Pharmacy (P) medicines and / or Prescription Only Medicines (POMs). They are not primarily concerned with NHS Prescriptions.

Once a Pharmacy Premises is registered with the General Pharmaceutical Council it is allocated a registration number which uniquely identifies each registered Pharmacy Premises. This registration number is a 7 digit number starting with the number 1.

All Pharmacy Premises that are currently registered with the General Pharmaceutical Council are listed on the General Pharmaceutical Council Register.

For further information on General Pharmaceutical Council Pharmacy Premises registration, see the General Pharmaceutical Council website.

Organisation Data Service (ODS) Codes:

To be able to dispense NHS Prescriptions, the Pharmacy Premises requires an Organisation Data Service code in addition to the General Pharmaceutical Council registration number.

The Organisation Data Service allocates the following codes:

- ~~Pharmacy HQ - see ORGANISATION CODE~~
- ~~Dispensary - see ORGANISATION SITE CODE.~~
- Pharmacy - see ORGANISATION CODE
- Pharmacy HQ - see ORGANISATION CODE.

~~Note 1: Codes for Executive Agency, Executive Agency Programme, Executive Agency Site and Executive Agency Programme Department do not easily fit into the coding frames as shown above and are therefore not included. This is due to their unusual structure in that there are more hierarchical 'tiers' than with other organisations.~~**Notes:**

- Codes for Executive Agency, Executive Agency Programme, Executive Agency Site and Executive Agency Programme Department do not easily fit into the coding frames as shown above and are therefore not included. This is due to their unusual structure in that there are more hierarchical 'tiers' than with other organisations.

  Executive Agency and Executive Agency Programme are both considered Organisation level entities, although each Programme does have a relationship to an Executive Agency. Executive Agency codes are three characters long. Executive Agency Programme codes are six, and their first three characters are the same as the Executive Agency they are associated to.

  Department codes of eight characters long can then be allocated underneath a Programme code (sharing the first six characters). Executive Agency Site codes of five characters long can be allocated under an Executive Agency code (and share the first three characters).

- *A-9 indicates that characters A-Z and 0-9 are valid: except B, I, O, S, U and Z (to avoid ambiguity). This applies to all ORGANISATION CODES in the Coding Format Table above except Independent Sector Healthcare Providers (ISHP).*

~~Note 2: The Pan SHAs are made up of confederations of SHAs and as such, are Health Areas, not organisations. However, it has been recognised that these health areas do require codes in order that NHS systems continue to function.~~

~~Note: A-9 indicates that characters A-Z and 0-9 are valid: except B, I, O, S, U and Z (to avoid ambiguity). This applies to all ORGANISATION CODES in the Coding Format Table above except Independent Sector Healthcare Providers (ISHP).~~

Note: Codes for Executive Agency, Executive Agency Programme, Executive Agency Site and Executive Agency Programme Department do not easily fit into the coding frames as shown above and are therefore not included. This is due to their unusual structure in that there are more hierarchical 'tiers' than with other organisations.

Executive Agency and Executive Agency Programme are both considered Organisation level entities, although each Programme does have a relationship to an Executive Agency. Executive Agency codes are three characters long. Executive Agency Programme codes are six, and their first three characters are the same as the Executive Agency they are associated to.

Department codes of eight characters long can then be allocated underneath a Programme code (sharing the first six characters). Executive Agency Site codes of five characters long can be allocated under an Executive Agency code (and share the first three characters).
