NHS Data Model and Dictionary Service

Type:	Data Dictionary Change Notice
Reference:	1601
Version No:	1.0
Subject:	Organisation Identifier Data Elements
Effective Date:	Immediate
Reason for Change:	Change to Format/Length of items not yet used in Data Sets
Publication Date:	12 December 2016

Background:

SCCI0090: Health and Social Care Organisation Reference Data included a number of changes including the introduction of unique identifiers, with a single, unified standard structure of 5 alternating alphabetic and numeric characters (ANANA) from 01 April 2020.

The associated NHS Data Model and Dictionary Change Request: CR1532 introduced a number of new Data Elements in the NHS Data Model and Dictionary for future use in new and existing data sets (with reference to the new ANANA structure).

It has since been identified that the Format/Length of the Organisation Identifier Data Elements are not compatible with XML Schema development, for example "an3 or an5".

This Change Request amends the new Data Elements added in NHS Data Model and Dictionary Change Request: CR1532 to include a "min and max" Format/Length., for example "min an3 max an5". This matches the Format/Length of the Organisation Site Identifier Data Elements which are "min an5 max an9.
