

NHS Data Model and Dictionary

Type: Change Request
Reference: 1915
Version No: 1.0
Subject: Diagnostic Imaging Data Set Version 2
Effective Date: 1 April 2026
Reason for Change: Change to Information Standards
Publication Date: 7 October 2025

Background:

The Diagnostic Imaging Data Set Version 1 was approved by the Information Standards Board for Health and Social Care (ISB) as [ISB 1577: Amd 10/2011 Initial Standard](#).

An update to the data set is required to enable the data set to meet a number of new user requirements that have emerged relating to diagnostic imaging data since the time it was introduced, particularly relating to understanding and supporting services more effectively, in order to improve outcomes of care.

The data set is being updated to Diagnostic Imaging Data Set Version 2. To achieve this the following has been undertaken:

- Amendments to National Code values and descriptions
- New Data Items
- Retirement of Data Items
- Changes to Organisation and Organisation Site Code Data Items to reflect changes to organisation reference data maintained and published by the Organisation Data Service, as defined by [DAPB0090: Health and Social Care Organisation Reference Data](#)
- Minor amendments to ensure alignment with the NHS Data Model and Dictionary.

To support the Information Standard, this Change Request updates the NHS Data Model and Dictionary to introduce the Diagnostic Imaging Data Set Version 2.

A short demonstration is available which describes "How to Read an NHS Data Model and Dictionary Change Request", in an easy to understand screen capture including a voice over and readable captions. This demonstration can be viewed at: https://datadictionary.nhs.uk/elearning/change_request/index.html.

Note: if the web page does not open, please copy the link and paste into the web browser. A guide to how to use the demonstration can be found at: [Demonstrations](#).

ABOUT THE NHS DATA MODEL AND DICTIONARY VERSION 3

Change to Supporting Information: Changed Description

Following the issue of [DSCN 07/2004 'Data Standards: Meta Model'](#), the NHS Data Model and Dictionary was changed to reflect and be based upon a more generic logical data model which better supports the strategic way forward. This NHS Data Model and Dictionary was published as the NHS Data Model and Dictionary Version 3.

There was extensive quality assurance of Version 3 including involvement of the Data Definition Group. All Version 3 contents were cross mapped and checked to ensure consistency with the Version 2 contents but the underlying structure was genericised. No changes were made to NHS Business Definitions. Version 3 superseded Version 2 on 1st May 2005.

[The NHS Data Dictionary Version 2](#) has been frozen and made available for archive information purposes only and has been watermarked accordingly.

Summary of main changes and enhancements incorporated within Version 3

- Introduction of the capability of holding Retired Items
- Introduction of NHS Business Definitions, which allow specific business areas to be defined in a more flexible manner
- New 'All Items Index' which lists all the contents held within the NHS Data Model and Dictionary
- Reduction in the number of data model diagrams making them more comprehensible
- Introduction of Domains, which are conceptual logical modelling objects which identify the logical format, length and value set attributable to one or more attribute(s)
- 'Where Used' list expanded to include a description of usage column
- Creation of a separate Meta Model area within the publication

The introduction of Version 3 had no impact on current information standards or system suppliers.

About the Generic Model

Version 3 introduced a new Generic Model which is '[PERSON](#)' based' rather than '[ORGANISATION](#)' based'. The model has been developed around generic '[CARE ACTIVITIES](#)' for a [PATIENT](#), with each event transaction being recorded.

The Generic Model supports all the messages, data sets and central returns which the model supported but the underlying structure has been genericised. This involved grouping many of the old classes into generic classes like [ACTIVITY GROUP](#). However, none of the detail was lost and most of the old class definitions can be found under 'NHS Business Definitions'. The number of diagrams has been greatly reduced and they now describe coherent areas of the model which is a far more useful approach for data modellers.

The model is aimed at enabling all '[CARE ACTIVITIES](#)' related to the same condition for the same [PATIENT](#) to be recorded and linked across [ORGANISATIONS](#). The different states of the same '[CARE ACTIVITY](#)' are recorded as event transactions e.g. requested, intended, scheduled, provided, cancelled, etc. These different state events also drive the scheduling and capacity planning of resources (people, equipment, facilities, etc.) to deliver the care.

Although this may seem complicated, it is necessary both to form a coherent logical model and to relate physical information such as that which flows on the Data Sets to the logical model. Every physical item should be represented logically in the NHS Data Model and Dictionary. However, the scope of the logical model is greater than the physical information it holds and therefore not all logical information has a physical existence.

~~Contact us for more information: [support](#).~~ Version 3+ introduced an accessible version of the NHS Data Model and Dictionary in September 2020. The diagrams were removed as they were not compatible with the new authoring software.

CHOOSE AND BOOK

Change to Supporting Information: Changed Description

[Choose and Book](#) is a national service that combines electronic booking and a choice of place, date and time for first hospital or clinic [APPOINTMENTS](#).

[Choose and Book](#) has been replaced by the [NHS e-Referral Service](#).

Data Set specifications that contain references to [Choose and Book](#) will be replaced with references to the [NHS e-Referral Service](#) in the next version of the Information Standards, where they are not already correct.

CLINICAL FINDING

Change to Supporting Information: Changed Description

A [Clinical Finding](#) is a [CLINICAL INVESTIGATION RESULT ITEM](#).

A [Clinical Finding](#) represents the [PATIENT DIAGNOSIS](#) and symptoms of the [PATIENT](#).

For example:

- Asthma (disorder)
- Headache ([Finding](#))
- Normal breath sounds ([Finding](#))
- Tired all the time ([Finding](#)).

DIAGNOSTIC IMAGING DATA SET OVERVIEW

Change to Supporting Information: Changed Description

Introduction

The [Diagnostic Imaging Data Set](#) was introduced by [ISB 1577 Diagnostic Imaging Data Set](#), in response to the lack of detailed data on national data on [Diagnostic Imaging](#) tests for NHS [PATIENTS](#). The original requirement came from the cancer strategy to improve [GP direct access to certain Diagnostic Imaging tests](#), as a method was required to monitor implementation of this policy. The [Diagnostic Imaging Data Set](#) was introduced by [ISB 1577 Diagnostic Imaging Data Set](#), in response to the lack of detailed data on national data on [Diagnostic Imaging](#) tests for NHS [PATIENTS](#). The original requirement came from the cancer strategy to improve [GP Direct Access to certain Diagnostic Imaging tests](#), as a method was required to monitor implementation of this policy.

The [Diagnostic Imaging Data Set](#), however, has many benefits for example, to:

- Provide NHS data on [GPs](#)' direct access to tests, as well as tests requested via other referral sources. Benchmarking data will be fed back to [GPs](#) and, where appropriate, used to encourage increased use of tests, leading to earlier diagnosis and hence improved outcomes
- Provide more detailed NHS data than is currently available on test type (modality), body site of test and [PATIENT](#) demographics
- Enable analysis of turnaround times for tests
- Enable better analysis of cancer pathways by linking the [National Cancer Registration and Analysis Service](#) data to [Diagnostic Imaging](#) test data for cancer [PATIENTS](#)
- Allow [Public Health England \(PHE\)](#) to calculate more accurate estimates of the distribution of individual radiation dose estimates from medical exposures.
- Allow [UK Health Security Agency \(UKHSA\)](#) to calculate more accurate estimates of the distribution of individual radiation dose estimates from medical exposures.

From April 2012 it became a mandatory requirement that all providers of NHS-funded [Diagnostic Imaging](#) tests for NHS [PATIENTS](#) in England submit the central [Diagnostic Imaging Data Set](#) on a monthly basis.

The [Diagnostic Imaging Data Set](#) facilitates the collection of clinical data and the sharing of such data to underpin the delivery of effective [Diagnostic Imaging](#). It is structured around the clinical processes of local Radiology Information Systems (RISs) used by [NHS Trusts](#) and [NHS Foundation Trusts](#). It records administrative data relating to [Diagnostic Imaging](#) test [ACTIVITY](#). It records administrative data relating to [Diagnostic Imaging](#) [ACTIVITY](#).

Information is collected relating exclusively to [Diagnostic Imaging](#) test [ACTIVITY](#). The [Diagnostic Imaging Data Set](#) describes [Diagnostic Imaging](#) tests that have taken place as part of a broader [PATIENT PATHWAY](#). This includes [PATIENTS](#) referred from within the [ORGANISATION](#), either as an out-patient, in-patient or from [Emergency Care Department](#), or referred directly from their [GP](#) or another [Health Care Provider](#). This includes [PATIENTS](#) referred from within the [ORGANISATION](#), either as an out-patient, admitted [PATIENT](#) or from an [Urgent and Emergency Care Service](#) or referred directly from their [GP](#) or another [Health Care Provider](#).

The [Diagnostic Imaging Data Set](#) is collected from NHS funded providers of [Diagnostic Imaging](#) test [SERVICES](#) and submitted via a portal on the [NHS England](#) website. The submissions are processed and aggregate extracts are produced for provider and commissioner [ORGANISATIONS](#) and national groups such as the [Department of Health and Social Care](#) and [Public Health England](#). This also allows linkage to the [National Cancer Registration and Analysis Service](#). Please note that the collection of the [Diagnostic Imaging Data Set](#) does not replace any other collection of diagnostic data such as the [Diagnostics Waiting Times and Activity Data Set \(DM01\)](#), which should continue to be collected.

Mandation

The Mandation column indicates the recommendation for the inclusion of data.

- M = Mandatory: this data element is mandatory and the technical process (e.g. submission of the data set, production of output etc) cannot be completed without this data element being present
- R = Required: NHS business processes cannot be delivered without this data element.
- R = Required: NHS business processes cannot be delivered without this data element
- P = Pilot: this data element is for piloting use only.

DIAGNOSTIC IMAGING WAITING LIST CLOCK START DATE

Change to Supporting Information: New Supporting Information

[Diagnostic Imaging Waiting List Clock Start Date](#) is an [ACTIVITY DATE TIME](#).

[Diagnostic Imaging Waiting List Clock Start Date](#) is the date that the waiting list clock started, where the [DIAGNOSTIC IMAGING ACTIVITY CATEGORY](#) National Code is '[Diagnostic Waiting List](#)'.

[Diagnostic Imaging Waiting List Clock Start Date](#) is the date when the:

- [DIAGNOSTIC TEST REQUEST](#) is made
- for the NHS e-Referral Service, either when:
 - the [UNIQUE BOOKING REFERENCE NUMBER \(CONVERTED\)](#) is first booked
 - the date appears on the [APPOINTMENT SLOT](#) issues list for the [Health Care Provider](#), or
 - the date is reset in accordance with the [Diagnostic Waiting Times](#) guidance.

For further guidance on the [Diagnostic Imaging Waiting List Clock Start Date](#), see the [NHS England](#) website at: [Diagnostic Imaging Data Set \(DIDS\)](#).

[DIAGNOSTIC IMAGING WAITING LIST CLOCK START DATE](#) is used with [CODED PROCEDURE START TIMESTAMP](#) to calculate the number of days the [PATIENT](#) spent on a [WAITING LIST](#) before receiving the [Diagnostic Imaging](#).

This supporting information is also known by these names:

Context	Alias
plural	Diagnostic Imaging Waiting List Clock Start Dates

GP DIRECT ACCESS

Change to Supporting Information: New Supporting Information

[GP Direct Access](#) is when a [PATIENT](#) is referred directly for a diagnostic test or treatment by their [GENERAL MEDICAL PRACTITIONER](#), thus bypassing the need for a secondary care referral and benefiting [PATIENTS](#) by leading to earlier [PATIENT DIAGNOSIS](#).

For further information on GP Direct Access, see the NHS England website at: [Urgent GP direct access to diagnostic services for people with symptoms not meeting the threshold for an urgent suspected cancer referral](#).

INTER-PROVIDER TRANSFER ADMINISTRATIVE MINIMUM DATA SET OVERVIEW

Change to Supporting Information: Changed Description

Introduction

This [Inter-Provider Transfer Administrative Minimum Data Set](#) specifies the data necessary to permit the receiving [Health Care Provider](#) to be able to report the [PATIENT](#)'s progress along their [PATIENT PATHWAY](#) and, in particular, their [REFERRAL TO TREATMENT PERIOD](#).

The NHS need to measure and monitor the [REFERRAL TO TREATMENT PERIOD](#) within [PATIENT PATHWAYS](#) to ensure that they are progressing as planned to achieve the 18 weeks target.

In an estimated 10% to 20% of cases, responsibility for the [PATIENT PATHWAY](#) will be transferred between [Health Care Providers](#). The receiving [Health Care Provider](#) would be unable to report on the 18 weeks target for these cases unless the referring [Health Care Provider](#) supplied the [PATIENT PATHWAY](#) information at the time of transfer.

Scope and Collection

- Completion is mandatory for all [PATIENTS](#) with a [REFERRAL TO TREATMENT PERIOD](#) where there has been a transfer of care to an alternative [Health Care Provider](#).
- Completion is advisable for [PATIENTS](#) without a [REFERRAL TO TREATMENT PERIOD](#), where there has been a transfer of care to an alternative [Health Care Provider](#), but this is voluntary.
- The referring [ORGANISATION](#) should send the data set within 48 hours of [DECISION TO REFER DATE \(INTER-PROVIDER TRANSFER\)](#).
- Inter-provider transfer [SERVICE REQUESTS](#) for clinical opinion or diagnostics, where the care of the [PATIENT](#) remains with the referring [Health Care Provider](#), are voluntary.
- [SERVICE REQUESTS](#) associated with the following [PATIENT PATHWAYS](#) are also not currently included:
 - Non-elective [PATIENTS](#)
 - Planned admissions (usually part of a planned sequence of clinical care determined mainly on social or clinical criteria, for example, a check cystoscopy).

Where the [Inter-Provider Transfer Administrative Minimum Data Set](#) is sent WITH the clinical referral letter it is considered to be complete if the following key data items are included:

- [NHS NUMBER](#)
- [PATIENT PATHWAY IDENTIFIER](#)
- [ORGANISATION CODE \(PATIENT PATHWAY IDENTIFIER ISSUER\)](#)
- [REFERRING ORGANISATION CODE](#)
- [REFERRAL TO TREATMENT PERIOD START DATE](#)
- [REFERRAL TO TREATMENT PERIOD STATUS \(INTER-PROVIDER TRANSFER\)](#)

Where the [Inter-Provider Transfer Administrative Minimum Data Set](#) is sent independently of the clinical referral letter, ALL mandated [Inter-Provider Transfer Administrative Minimum Data Set](#) data items must be completed.

Further Guidance

Further guidance on the data set can be found in 'The Inter-Provider Transfer Administrative Data Set Operational Information Standard' and in [DSCN 30/2007](#). Further guidance on the data set can be found in 'The Inter-Provider Transfer Administrative Data Set Operational Information Standard' and in [DSCN 30/2007](#).

Further guidance and definitions on [REFERRAL TO TREATMENT PERIODS](#) and those [PATIENT PATHWAYS](#) included within the Consultant-Led Referral to Treatment Waiting Times can be found on the [NHS England](#) website at: [Consultant-led Referral to Treatment Waiting Times](#).

Mandation

The Mandation column indicates the NHS recommendation for the inclusion of data:

- M = Mandatory: this data element is mandatory and the technical process (e.g. submission of the data set, production of output etc) cannot be completed without this data element being present
- O = Optional: the inclusion of this data element is optional as required for local purposes.

MAIN SPECIALTY AND TREATMENT FUNCTION CODES TABLE

Change to Supporting Information: Changed Description

Guidance Notes relating to [MAIN SPECIALTY CODE](#) and [TREATMENT FUNCTION CODE](#).

For further information regarding the definition and use of [MAIN SPECIALTY](#) see the attribute [MAIN SPECIALTY CODE](#).

For further information regarding the definition and use of [TREATMENT FUNCTION](#) see the attribute [TREATMENT FUNCTION CODE](#).

Note:

- New National Codes for [MAIN SPECIALTY CODE](#) and [TREATMENT FUNCTION CODE](#) were introduced from 2 April 2020 as part of the update to the [DCB0028: Treatment Function and Main Specialty Standard](#). Submission of these codes for the Commissioning Data Sets is only possible where the healthcare provider has updated their CDS-XML schema version to CDS-XML version 6-2-0. Users of the original CDS-XML schema version 6-2 will be unable to submit the new codes introduced in the release of [DCB0028: Treatment Function and Main Specialty Standard](#) in April 2020 or the addendum to DCB0028 released in January 2021 to add a new [TREATMENT FUNCTION CODE](#) to represent Post-COVID-19 Syndrome Services.

NHS E-REFERRAL SERVICE

Change to Supporting Information: New Supporting Information

The [NHS e-Referral Service \(e-RS\)](#) is a digital platform that provides an easy way for referrers and service providers to manage their [PATIENTS'](#) journeys

For further information on the [NHS e-Referral Service](#), see the [NHS England](#) website at: [NHS e-Referral Service](#).

[Choose and Book](#) has been replaced by the [NHS e-Referral Service](#).

Data Set specifications that contain references to [Choose and Book](#) will be replaced with references to the [NHS e-Referral Service](#) in the next version of the Information Standards, where they are not already correct.

PLANNED DIAGNOSTIC DUE DATE

Change to Supporting Information: New Supporting Information

[Planned Diagnostic Due Date](#) is a [PLANNED ACTIVITY DATE TIME](#).

[Planned Diagnostic Due Date](#) is the date that the planned [Diagnostic Imaging](#) test was due, where the [DIAGNOSTIC IMAGING ACTIVITY CATEGORY](#) National Code is '[Planned Diagnostic](#)'.

For further guidance on the [Planned Diagnostic Due Date](#), see the [NHS England](#) website at: [Diagnostic Imaging Data Set \(DIDS\)](#).

This supporting information is also known by these names:

Context	Alias
plural	Planned Diagnostic Due Dates

SNOMED CT

Change to Supporting Information: Changed Description

[SNOMED CT](#)® is the clinical terminology approved as an Information Standard.

Requirements for utilising [SNOMED CT](#)® are stated within the [National Information Board](#) document "[A Framework for Action](#)" and [SNOMED CT](#)® can be downloaded from [Technology Reference Update Distribution \(TRUD\)](#).

[SNOMED CT](#)® provides the clinical language that facilitates electronic communication between healthcare professionals in clear and unambiguous terms, and can be used to code, retrieve and analyse clinical data.

[SNOMED CT](#)® is comprehensive and provides clinical terms for all healthcare professions. Applications often use subsets of [SNOMED CT](#)®, known as [SNOMED CT Refsets](#), that have been developed to support specific requirements. The NHS Data Model and Dictionary references [SNOMED CT Refsets](#) to support data reporting for specific data items.

[SNOMED CT](#)® has been distributed in Release Format 2 (RF2) since 1 April 2018. [SNOMED CT](#)® contains [SNOMED CT Refsets](#) referenced by [SNOMED CT Refset](#) ID, which are listed in the [SNOMED CT Browser](#).

[SNOMED CT](#)® is managed and maintained internationally by [SNOMED International](#) and in the UK by [NHS England](#).

National and International arrangements have been established to ensure there is adequate and relevant governance of [SNOMED CT®](#), to ensure it meets the needs of healthcare in the respective jurisdictions.

Note: previous versions of SNOMED (including SNOMED RT and SNOMED 3) ceased to be licensed after April 2017 other than for historical content.

Mapping tables and guidance to enable historical data previously captured using a previous version of SNOMED, can be found on the [Technology Reference Update Distribution \(TRUD\)](#) at: [SNOMED Antecedent Versions Data Migration](#).

SNOMED CT REFSET

Change to Supporting Information: Changed Description

A [SNOMED CT Refset](#) is a data structure defined within [SNOMED CT®](#) Release Format 2 (RF2), which consists of a set of references to [SNOMED CT®](#) components, like concepts, descriptions or relationships.

In its simple form a [SNOMED CT Refset](#) is used to represent a subset of [SNOMED CT®](#) content.

[SNOMED CT Refsets](#):

- Usually represent groups of concepts that share specified characteristics (for example, a specific clinical domain)
- Support user interface development through the organisation of clinical display, creation of menus and pick-lists, or support of knowledge structures
- May be created as value sets for messaging or data entry.

Different types of [SNOMED CT Refsets](#) are used to represent:

- Descriptions or concepts for particular realms or specialties
- Suitability of particular concepts for use in a particular context in a record.

For further information on [SNOMED CT Refsets](#), see:

- The [SNOMED CT®](#) Glossary at: [SNOMED CT reference set](#)
- The [SNOMED CT®](#) Document Library at: [Reference set](#)
- [Delen](#) at: [Data Dictionary for Care \(DD4C\) Migration to Delen](#).

Change requests for [SNOMED CT Refsets](#) released by [NHS England](#) should be made through the Request Submission Portal on the [NHS England](#) website at: [Welcome to the Request Submission Portal](#).

CODED CLINICAL ENTRY

Change to Class: Changed Description

An entry in an [ELECTRONIC HEALTH RECORD](#), recorded by a [CARE PROFESSIONAL](#), [PATIENT](#) or [Patient Proxy](#), or other authorised [PERSON](#), relating to [ACTIVITIES](#) for the care and treatment of a [PATIENT](#).

[CODED CLINICAL ENTRIES](#) may describe:

- [CLINICAL INTERVENTIONS](#)
- [CLINICAL INVESTIGATION RESULT ITEMS](#)
- [PATIENT DIAGNOSES](#)
- [PERSON PROPERTIES](#)
- [PLANNED ACTIVITIES](#)
- [ACTIVITY DRUGS](#)
- [CARE PLANS](#)
- [ACTIVITY GROUPS](#)
- [CARE ACTIVITIES](#)
- any other aspect of [PATIENT](#) care and management.

A [CODED CLINICAL ENTRY](#) in an [ELECTRONIC HEALTH RECORD](#) should include the recording of relevant [CLINICAL TERMINOLOGY CODES](#) and/or [CLINICAL CLASSIFICATION CODES](#). Where information to complete the [CODED CLINICAL ENTRY](#) is missing, a [DATA ABSENT REASON](#) should be recorded.

Requests for Change:

- Change requests for [CLINICAL TERMINOLOGY CODES](#) and [CLINICAL CLASSIFICATION CODES](#) released by [NHS England](#) should be made through the Request Submission Portal on the [NHS England](#) website at: [Welcome to the Request Submission Portal](#).
- Requests for medicines or devices terminologies should be made via the Service Desk at: support.digitalservices@nhs.net.

CLINICAL CLASSIFICATION CODE

Change to Attribute: Changed Description

A unique clinical classification identifier for a [CODED CLINICAL ENTRY](#).

This could be [OPCS Classification of Interventions and Procedures \(OPCS-4\)](#) codes or [International Classification of Diseases \(ICD\)](#) codes.

~~See [Clinical Coding](#) for further information about the types of [CODED CLINICAL ENTRIES](#).~~

CLINICAL TERMINOLOGY CODE

Change to Attribute: Changed Description

A unique clinical terminology identifier for a [CODED CLINICAL ENTRY](#).

This could be [Read Coded Clinical Terms](#), [SNOMED CT](#) concepts / expressions, or defined in the [National Interim Clinical Imaging Procedure Code Set](#).

~~See [Clinical Coding](#) for further information about the types of [CODED CLINICAL ENTRIES](#).~~

Note: [SNOMED CT](#) is the Information Standard for clinical terminology for use within the NHS; it is planned that in time this will be the only terminology used by the NHS.

DIAGNOSTIC IMAGING ACTIVITY CATEGORY

Change to Attribute: New Attribute

PRIORITY TYPE

Change to Attribute: Changed Description

The priority of a [SERVICE REQUEST](#).

In the case of [SERVICES](#) to be provided by a [CONSULTANT](#), it is as assessed by or on behalf of the [CONSULTANT](#).

- **PRIORITY TYPE** National Code '*Urgent*' should be used where the [SERVICE REQUEST](#) is defined as clinically urgent, but it does not fall under the criteria for '*Two Week Wait*' (see below).
- **PRIORITY TYPE** National Code '*Two Week Wait*' should be used where either:
 - the [SERVICE REQUEST](#) meets the criteria for an urgent referral for suspected cancer. These referrals should be made in accordance with the [National Institute for Health and Care Excellence \(NICE\)](#) clinical guidelines on referral for suspected cancer. For further information, see the [National Institute for Health and Care Excellence](#) website at: [Suspected cancer: recognition and referral](#).
 - or
 - the [PATIENT](#) has been referred urgently for breast symptoms, but the referral does not meet the criteria for urgent referrals for suspected cancer.

Note: Changes to cancer waiting times standards from 1 October 2023 were announced by [NHS England](#) at: [Changes to cancer waiting times standards from 1 October 2023](#). Until changes to the [PRIORITY TYPE](#) data item are made to support this change, National Code 'Two Week Wait' should continue to be used by [Health Care Providers](#), to record the [PRIORITY TYPE](#) for [REFERRAL REQUESTS](#) which fall under the new Faster Diagnosis provisions.

[PRIORITY TYPE](#) will be replaced with [SERVICE REQUEST PRIORITY TYPE](#), which is the most recent approved national information standard to describe the required definition.

Notes:

[COMMISSIONING SERIAL NUMBER](#) is the same as attribute [NHS SERVICE AGREEMENT NUMBER](#).

From 01/04/2001 this data item will be used to identify [PATIENTS](#) treated under [Non-Contract Activities](#), [NHS Trusts](#) and [NHS Foundation Trusts](#) are required to insert the letters 'OAT' (mandated input as capitals) in the first three characters of the [COMMISSIONING SERIAL NUMBER](#) field of the Admitted Patient Care Commissioning Data Set. ~~The remaining three characters will continue to be defined locally, see [DSCN 17/2000](#).~~ The remaining three characters will continue to be defined locally, see [DSCN 17/2000](#).

From 01/04/2005 an '=' (equals) as the last significant character in this six character field will indicate an episode that should be excluded from the [National Tariff Payment System](#) tariff.

The position of the last character depends on any preceding characters eg 1st character if field is otherwise blank, 4th character if following 'OAT', up to a maximum of 6th position. This provides a general exclusion facility for unusual circumstances or where more specific rules regarding coding in other fields cannot be implemented due to local software restrictions.
